

QuikDekClor[®]

POOLSIDE CHLORINE FEEDER

A&A's QuikDekClor provides efficient and effective chlorine distribution, while protecting your pool's system from chemical wear and tear. And with its easy-to-access poolside installation, managing your pool's chlorine has never been more convenient.

*Available in
multiple lid colors*

*Includes internal
locking safety lid.*

*Compatible with
multiple tab sizes.*

Made in the USA.

*Inflows from fully
adjustable valve.*

*Fully-chlorinated
water flows back
into your pool.*

A&A Manufacturing's QuikDekClor installs at the deck of your pool—rather than the equipment pad—for easy access. By delivering chlorine directly into your pool, QuikDekClor prevents chemical wear and tear on your pump motor and filtering systems.

The QuikDekClor's specially engineered inlets create an even water flow around chlorine tabs, which ensures consistent disbursement. This design allows for easy adjustment to compensate for swimmer load and pool conditions, saving you excess chlorine costs while playing an integral part in a truly clean pool.

No periodic maintenance needed

Convenient poolside location

Simple installation

Prevents harmful corrosion and damage to equipment
